

## *Building Businesses and Relationships to Create Lasting Value*

Based in Michigan, Colfax Creek is a private investment firm that takes a long-term approach to investing in "smaller" middle market companies. The firm invests in consumer product, service, and industrial companies with EBITDA from \$2 million to around \$7 million based on the strength of our 'edge' within the industry and business. We prefer to support existing management, but we will affect limited management transitions. We are control investors but will partner with like-minded investors. We do not mind racking up airline miles, but our core investing and operational relationships are predominately a drive from Detroit.

Jason Duzan, the principal of Colfax Creek, has invested in middle market companies for over twenty years -- leading or co-leading nearly two billion in investment transactions in consumer, service, and industrial companies primarily in the Midwest. Jason brings his investing expertise and collaborates with operating executives and entrepreneurs to build businesses. Jason's partnership focused investment approach is based on a shared purpose and on creating long-term value for the business. We pride ourselves on integrity and transparency – "doing what we say we are going to do." For more information, visit [www.colfaxcreek.com](http://www.colfaxcreek.com).

## INVESTMENT GUIDELINES (NOT RULES)

### GEOGRAPHY

Great Lake States - operations within a drive from Detroit

### INVESTMENT STRUCTURE
